

LokChain

See, Secure, Develop

One universal wallet address to rule a new era of IoT of value. It's time to Get Paid for Your Data...

The vital protocols, processes and technology driving Blockchain or DLT technology uses public key infrastructure (PKI). These mechanisms will not allow the desired blockchain interoperability, cross organization, cross datastore, cross corporation nor cross certification. In the current state, there are many problems troubling blockchain; very few blockchains are truly P2P network or 75% decentralized; mining is very irrelevant in many economies; the underlying technology and implementation of current blockchain is susceptible to the current internet security vulnerabilities [4]. Cryptojacking is a new and rising cyberthreat as a result of these vulnerabilities [5]. We argue that the removal of all server (centralization) infrastructures will pave the way for interoperability, in turn all platforms will scale at once. Mobile, IoT and blockchain platform will be a marriage in heaven.

DETAILS OF PRESALE/PUBLIC ROUND

We announced the date for the Public round of our STO and Token Generation Event (TGE) below. We have also revised our coin or token economics (Coinomics), thereby provide more room for growth in our community of supporters and funders. Token price will be fixed in LCN. However, XEM or ETH or BTC or BCH are acceptable. **No max. limit to contribution.**

LokChain ICO Presale

Start date: **20th of December. 2018** Time: 12:00 AM EST, 9PM PST, 3AM UTC-2

End date: 13th of February 2019

Token ticker: LokCoin (LCN)

Total supply: 8, 999,999

Price: 1 LCN = TBA after Public Rounds ICO

Minimum contribution: \$500

Bonus: \$5000+ 20% discount

\$1000, 2.5% discount

LOKCHAIN ROADMAP

GLOBAL MARKET VALUE PROJECTION

Global smartphone market value will reach 1,503,802.1M by 2026 [1]

Global IoT market value will reach \$8.9T in 2020, attaining a 19.92% Compound Annual Growth Rate (CAGR) [2]

Global blockchain market size is expected to grow from USD 1.2 billion in 2018 to USD 23.3 billion by 2023, at a Compound Annual Growth Rate (CAGR) of 80.2% during the forecast period [3]

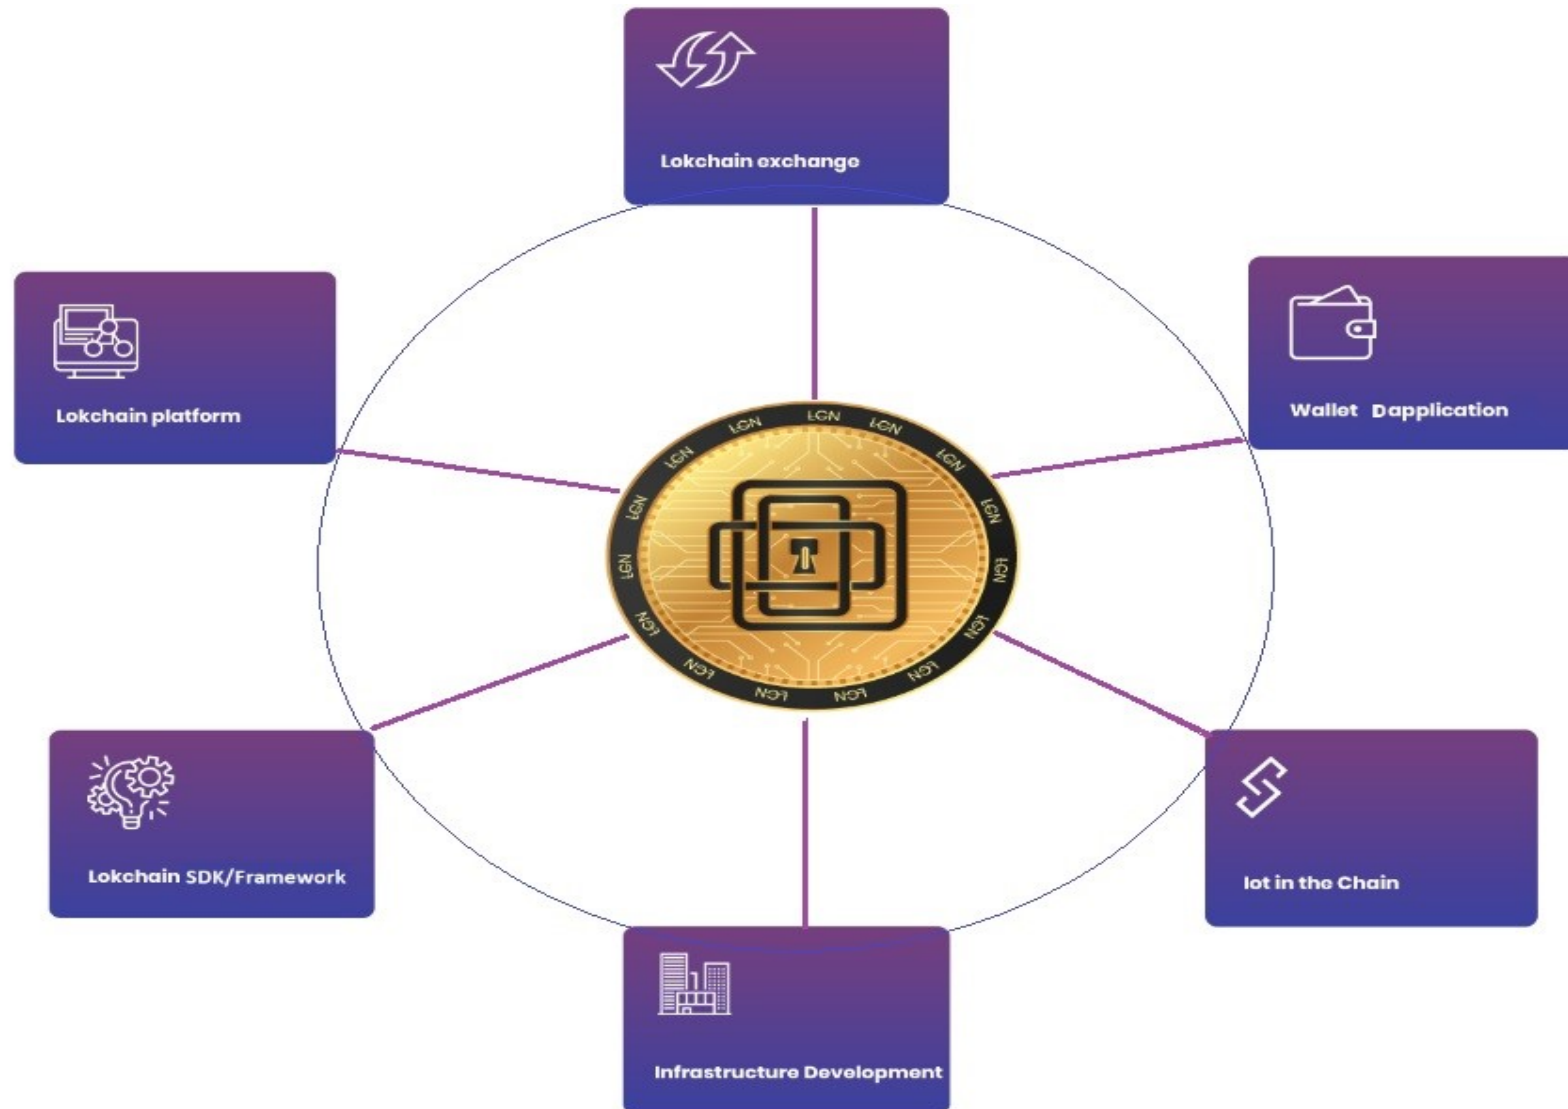

What is LokChain?

It is a web of technologies including protocols, that causes interconnection of IoT, Mobile node on P2P network with autonomy that allows cryptographical mechanism based on secret key infrastructure (SKI) for immutable recording on distribution ledger. All these unified as LokChain Platform.

What is LokCoin?

Its a native asset of Lokchain Platform used as inter-blockchain cryptocurrency. Its ticker is **LCN**.

HOW THE ECOSYSTEM WORKS

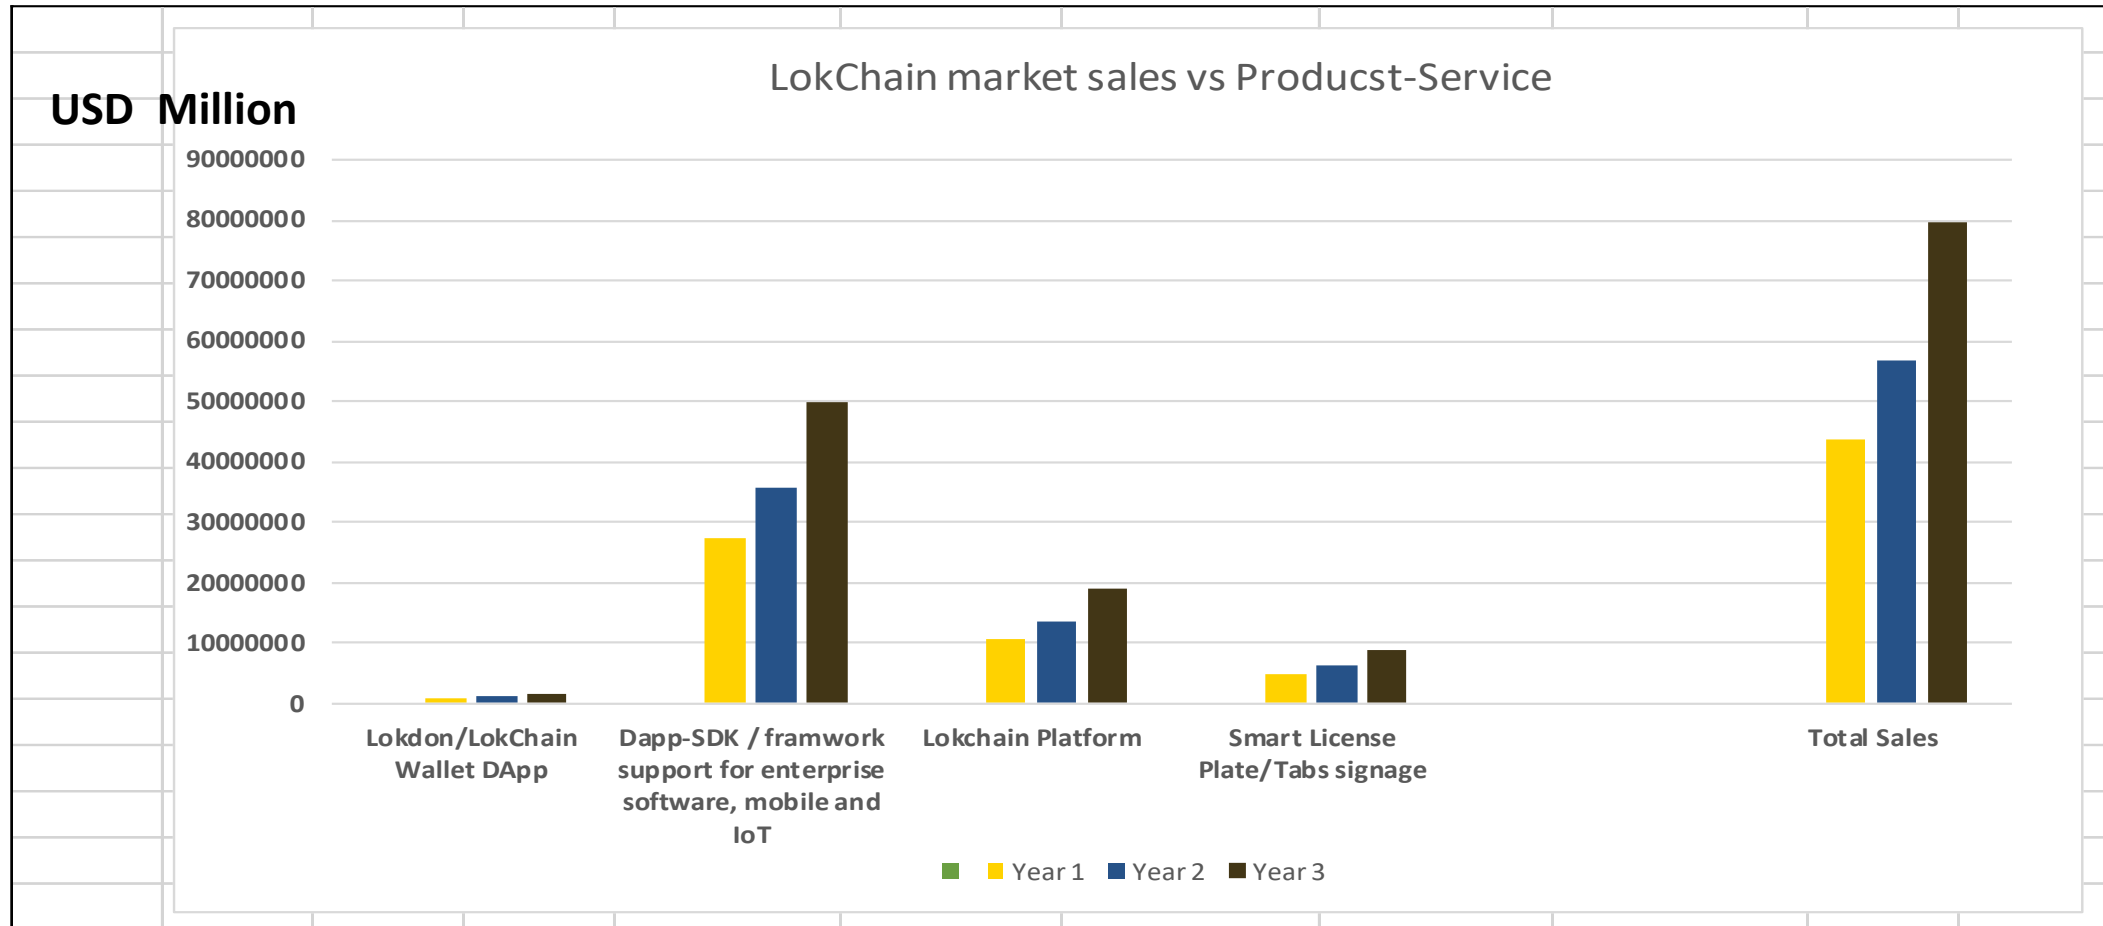

LOKCHAIN BUSINESS MODEL

Our business model is quite unique. Our profit will come from the subscriptions and licenses of our products. We also expect to generate a significant amount of revenue from the services we offer. We are confident to meet the future challenges with our current solutions. Especially with the proliferation of IoT and other related technologies. We know that our platform will be needed more than ever because it reduces security threats by removing third party entities.

25% of the profit circulated in token will be used to finance infrastructures on a global scale. Any market that offers comparative advantage will be understudied and used as a hedge. The fund assigned will continuously feed into the ecosystem. By doing so, we can complete a smart city (data center hub) by 2023. In turn this will cause a natural rise in the token value, especially when the infrastructure is completed. Take a look at the 3 years projection forecast below.

Product/Service Lines	Year 1	Year 2	Year 3
Lokdon/LokChain Wallet DApp	\$ 955,027.59	\$ 1,241,535.87	\$ 1,738,150.22

FAQ

- **How can I buy LCN coin?**

LCN could be obtained during private and public sales. Please check our website and social media sites regularly.

- **Is LCN a security token?**

Yes! It is a security token.

- **What will be the primary use of LCN?**

The primary use of LCN is to add incentive to the network, tendered for transactions and hold relative value in the LokChain network and other interested platforms who are willing to cross over. It could be traded as stocks and will be traded in exchanges as well as provide liquidity for fiat. Its value is not euphorically derived as depicted in the current cryptocurrencies. LCN is based on a formula and a profitable business model.

- **Will LCN be traded in exchange?**

Yes! We also want to build a better exchange for our ecosystem

FORMULA FOR TOKEN VALUE CALCULATION

Average Value of ICON_n = Amount in USD / Number of contributors

% Real Asset Realized = Amount in USD / Total cost of Real Asset

Token value (TV_n) = Average Value of ICO * % Real asset realized,

where n = level of ICO. If n = 5; Token value (TV_n) = TV_{n-4} + TV_{n-3} + TV_{n-2} + TV_{n-1} + TV_n

Num Token in ICON_{n=1} = individual amt in ICON_{n=1} / Token Valuen=1

[Sum Token ICON = Num Token in ICON]

Sum Token ICON_{n=1} = Num Token in ICON_{n=1}

Num Token in ICON_{n=2} = individual amt in ICON_{n=2} / Token Valuen=2

[Sum Token ICON = Num Token in ICON + Num Token in ICON]

Sum Token ICON_{n=2} = Num Token in ICON_{n=1} + Num Token in ICON_{n=2}

Sum Token ICON_{n=2} @ TV_{n=2}

Sum Token ICON_{n=2} * TV_{n=2} = Cumulative ICON_{n=2}

Num Token in ICON_{n=3} = individual amt in ICON_{n=3} / Token Valuen=3

Sum Token ICON_{n=3} = Num Token in ICON_{n=1} + Num Token in ICON_{n=2} + Num Token in ICON_{n=3}

[Sum Token ICON @ TV = Cumulative ICON]

Sum Token ICON_{n=3} * TV_{n=3} = Cumulative ICON_{n=3}
